DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 11, and 17, the most relevant prior art of record teaches communicating within a cordless telephone call over a first wireless communication link; receiving an incoming group call over a second wireless communication link, the second wireless communication link being operable to support simultaneous communication between the communication device and a plurality of additional communication devices; placing the cordless telephone call in a hold mode so as to mitigate interference on the second wireless communication link; and establishing communication within the group call. However, the most relevant prior art of record fails to meet the newly added limitations requiring the two-way radio system and cordless system to be independent from one another and requiring the cordless telephone call to remain in hold mode without utilizing the cordless telephone system, in combination with all the recited limitations of claims 1, 11, and 17. The Examiner would like to present *Pierce et al* (U.S. 5,666,364 A) to Applicant to demonstrate that the problem of not being able to receive a dispatch call while on interconnect call (column 2, lines 7-15) was old and well known in the art; however, *Pierce*, nor the most relevant prior art of record, solves this problem in the novel way of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
